

FIBRE OPTIC TOOLS & TEST EQUIPMENT

CFS-2 FIBRE STRIPPER

PRODUCT SPECIFICATIONS

The CFS-2 stripper is used to remove the buffer coating with a diameter of 250 um from fibre cladding with a diameter of 125 um. The tool also has a hole with a diameter of 1.98 mm giving the possibility to cut the cable jacket. Thanks to its ergonomic design, the tool is comfortable to use. It precisely removes the buffer whilst ensure no damage to the cladding.
