

FIBRE MANAGEMENT

Sliding Patch Panel

(FC Simplex 12)

This sliding patch panel presents up to 12 fibres as FC or ST connections.

The front of the panel has exchangeable front frames for use with any fibre optic connector type. The tray slides out to allow easy access while preserving the bend radius of connecting patch cables. When fully extended the panel pivots down 45 degrees at a convenient working angle.

Allows direct connection of pre-terminated cables or 12 individual bare fibre splices. With adequate fibre storage for 0.9mm pigtails.

Available empty or loaded in any configuration and with any approved fibre type.
